About US

Technofreak Concept Nigeria Ltd. was incorporated on the 13th day of February 2018 as a limited liability company under the Corporate Affairs Commission (CAC) of the Federal Republic of Nigeria.

Technofreak Concept is an engineering services company that delivers exceptional solutions to individuals, public institutions, and private industries in the areas of:

- Heating and Refrigeration Technology
- Utilities Management & Maintenance
- Mechanical Engineering
- Electrical & Automation
- Safety Management – Ammonia Process Safety Management etc.

While headquartered in Nigeria, our operations extend across Western and Central Africa, where we continue to provide high-quality, cost-effective engineering services.

Technofreak Concept Nigeria Ltd. is structured to allow efficient and effective management of internal administration in the management of specific contracts. This structure encourages single point communication between any of our company representatives and client.

The combination of Technofreak Concept Nigeria Ltd. adherence to internationally acceptable work quality and its financial capability contribute to its success over the years.

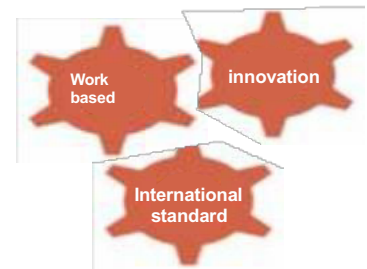

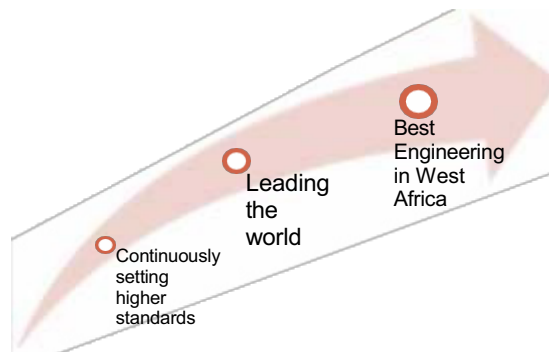

Our Vision

To be the best engineering services provider across western & central Africa and beyond by setting higher professional standards.

Aims to achieve the vision

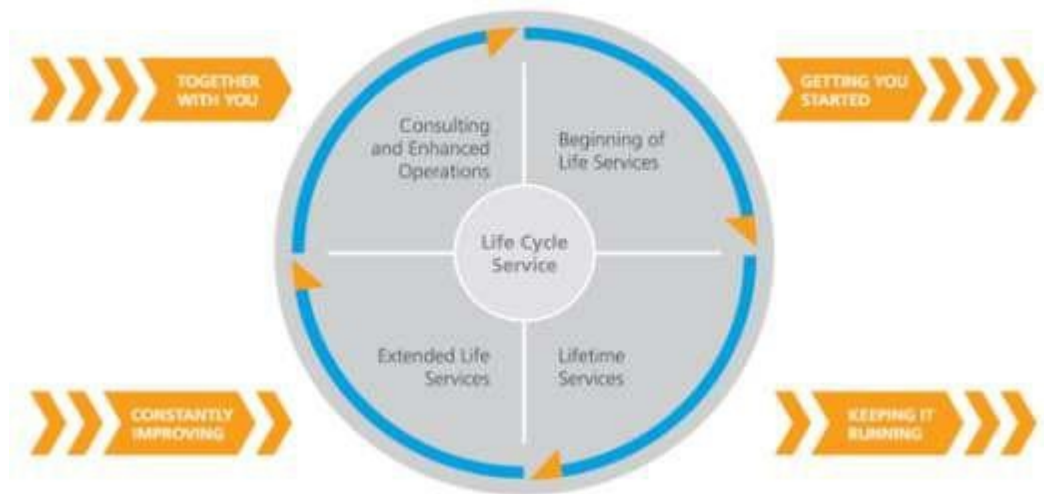

- Innovation
- Work based on best practices using international standards and codes
- Continuous Improvement
- Continuous development of staff capability

Our Mission

Technofreak is an Engineering Services provider that reduces operating costs and maintains high efficiency of Utilities Plants. We work alongside our customers in close partnership, supporting them throughout the full life cycle of their plant and equipment to ensure lasting business success.

Our four stages of continued success

Getting you started - Seamless support for instant productivity and performance.

We start as we mean to go on, a supportive and committed partner for life. We plan and build around individual needs, sharing process knowledge, training employees and supporting operators to get our customers up and running and ensure a smooth, seamless on-going service.

Keeping it running - The cost-effective way of ensuring safety and reliability.

To ensure our customers benefit from continuous production processes for minimal unexpected downtime, we provide fast support, efficient maintenance and top-quality spare parts, whenever and wherever needed.

Constantly improving - Sharing our knowledge to safeguard your investment.

We safeguard our customers' investments by constantly looking ahead through modernizing or upgrading of equipment and processes optimization to meet changing needs. We are always working to increase production efficiency and ensure peak performance.

Together with you - Enduring commitment to your business.

Commitment to our customers and their business means investing in their objectives, their risks and their future success. We work in ever-closer collaboration, providing on-going systems audits and remote/on-site support through innovative new service models in order to generate improved performance.

Technofreak offers its customers a complete range of services, varying from maintenance intervention and spare parts supply to complete Service Level Agreements and remote support, utilizing skilled personnel.

Inspection/Preventive/Corrective/Predictive maintenance and Overhaul of Utility Plants

- Preventive maintenance for continuous production
- Corrective maintenance –24/7 responsiveness, 100 % efficiency
- Predictive maintenance –Bringing more insight and performance to you
- Overhaul for extended life with improved efficiency

Spare Parts Supply

- Consumables requirements (spare parts for periodic maintenance based on machine operation hours or years of plant on operation)
- Critical spare parts (parts determining plants downtime)
- Capital spare parts (high value spares with long deliveries)
- Generic spare parts

When spare parts are vital, ours are available. Spare parts supply strategy can be adapted to client's need to guarantee prompt availability of certain spares at client's premises.

Service Level Agreements

- Performance contracts –Welcome to your continued success
- Scheduled visits of Technofreak engineers/Specialists for plant audit to check, correct and optimize the utilities plants performances
- Scheduled visits of specialists to execute preventive maintenance on utilities equipment
- Time and service conditions to supply on-site corrective maintenance in case breakdowns / emergencies
- Remote support

Emergency Intervention

- Technofreak Engineers/Specialist are readily available for any emergency call for support
- Remote emergency support also available when need be

Training courses—Make your staff experts in processes

Our experienced engineers train your employees – on site theoretically and practically to deliver their full potential. We will provide your staff with comprehensive operation attaining, valuable process knowledge and asset health awareness so they can safely and expertly run and maintain your plant and processes.

All training modules are tailored to the individual needs of your business, delivering decisive advantages:

- Optimum plant and equipment efficiency
- High plant availability and reliability
- Highly qualified and efficiently trained personnel
- Asset health awareness

By sharing our knowledge, we help to ensure your business benefits from maximum efficiency and minimum downtime.

Utilities Plants improvements

- Customized solution to update our client's plants to latest technical solutions
- Plants control system revamping

Technofreak elevate Service by delivering values that extends well beyond the equipment life cycle. Together with you we develop targeted services that demonstrably boost your performance. We focus on your goals: the increase of availability, productivity and sustainability – enabled by digitalization.

Our Service Value Promise

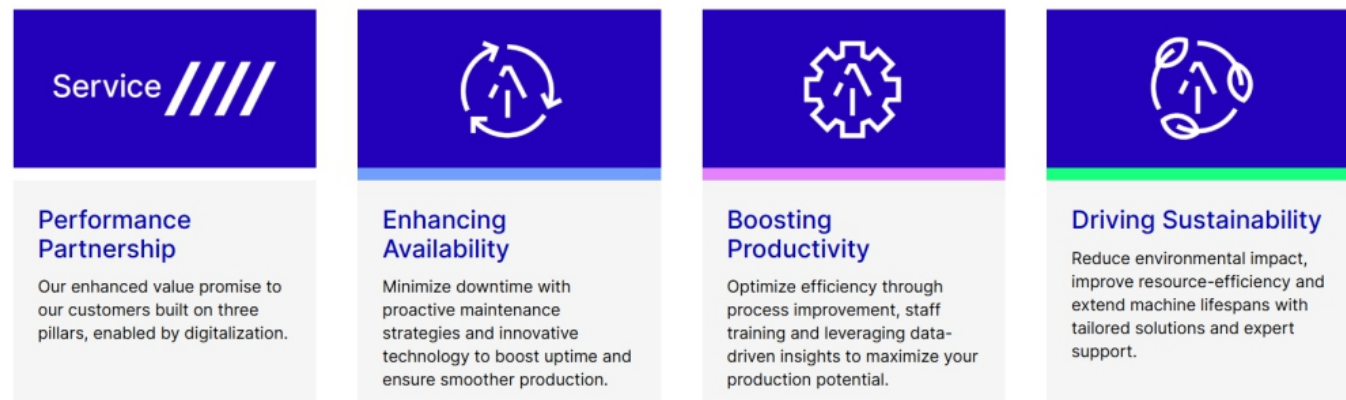

We deliver service solutions for the entire life cycle of your plant and equipment. Partnering with you, we strengthen your continued performance through our dedicated service expertise.

The result Comprehensive services beyond routine maintenance that unlock your full potential.

Enabled by digitalization.

Enhancing Availability. Boosting Productivity. Driving Sustainability. To unlock your full potential.

PROFILE OF KEY PERSONNEL

OLATUNJI Fayemi Kenneth

Olatunji Fayemi Kenneth is highly resourceful and a result-oriented person. He is a self-motivated individual with a great sense of responsibility. He holds HND in Mechanical Engineering from Federal Polytechnic, Ado Ekiti, PGD and Master Degree in Safety Technology Management from Ladoke Akintola University of Technology, Ogbomoso.

He is a specialist in Utilities Management, Maintenance Planning, Scheduling and General Overhaul with years of hand-on experience, consistently delivering values and Continuous Improvement. He is an effective skilled communicator with good presentation skills on six utilities plants and auxiliaries of Breweries and have keen interest and passion in people development capabilities.

He was trained by Heineken on Utility Plant Operation and Maintenance in Nigeria Breweries Training school at Ibadan for Consolidated Breweries PLC, Ijebu Ode now Nigerian Breweries PLC where he served for 5years before he joined Guinness Nigeria PLC as a Senior Specialist in-charge of Utility Plant. He managed several project while in Guinness such as; Installation and Commissioning of Grasso Screw Compressor (Grasso WR-W30S-28), Upgrading of CO₂ Recovery Plant, Installation of Utilities Metering and Telemetry System among others. He also earned many awards and Recognitions such as; Engineering Star of the Month and M.A.D Heroe Q1 2018 for Improving CO₂ Plant Efficiency from 83%-95% after overhaul which saved the sum of #11.6million for the first 18days of financial year due to zero purchase of CO₂ and also eliminate the

cost of bringing Pentair Haffmanns expert from Netherland for the job. He drastically reduced the intervention of foreign expert that cut down the maintenance cost by over 50% as a result of his wealth of knowledge on the utilities equipment.

Fayemi left Guinness Nigeria Plc, for International Breweries Plc. Sagamu, a proud member of ABInbev with 4.5million capacity per annum as a pioneer Utility Engineer. He used his expert judgment to corrected many errors during the installation and commissioning of the utility plant and he stabilized all the six utilities plants within short period. He was the head of Asset Care for both Energy & Fluids and Environmental Departments of the breweries till he left for the role of Field Service Engineer-Refrigeration in GEA West Africa LTD. He was also a pioneer Engineer in charge of Refrigeration in the company that covers both West and Central Africa countries. He attended several technical trainings oversea for him to be self-dependent on the job. He is married with wonderful children.

NYAM CHUWANG BOT

NYAM Chuwang Bot is an experience engineer in the field of Process Control and Automation engineering willing to be a part of an organization wherein innovation and latest technological advancements are embraced.

He is HND holder in Electrical and Electronic Engineering from Institute of Management and Technology, Enugu and also an alumnus of Technical Training Center (NBC Plc) and Institute for Industrial Technology (IIT) Lagos, where he learned more on Electro-Mechanics Engineering.

Having worked in the field of Electrical and Automation Engineering, for 12years in Coca cola Hellenic, He moved to International Breweries PLC, Sagamu as Process Control Engineer, where he was responsible for handling of Sectional Maintenance Control and Automation Controllers and teams, training, and developing as well as testing projects with them. He was also responsible for working in close coordination with the Sectional engineers (brewery, packaging and Utility) to ensure all deliverable KPI are achieved. He is an expert in Condition monitoring, PLC and SCADA system.
